

Motivation Letter for Data Science Master

Dear Sir/Madam

With this motivation letter I want to express my strong will of pursuing the master's in data science from the Ethiopia University of computer engineering, as I have always dreamt of becoming the part of this honoured institution.

As of now I'm working as a network engineer in the Infosys and being there I have realized that there is much to learn yet for me in the domain of data science. This is the reason that why I'm having a strong will of pursuing my master's, so that I can give boost to my career ahead in the different dimension of the same domain.

Your Truly
