

# Motivation Letter for Masters Degree in Data Science

Dear Sir/Madam

It's a matter of great honour to me that today I'm making my admission application to seek the admission in one such institution whom I have idolized all my life. With this motivation letter I want to express my strong urge of studying the master's in data Science from this noble institution.

I have completed my graduation in the data science and being the techie I want to take up my career ahead in the other streams such as machine learning, data science, artificial intelligence etc. This is the sole reason that why I'm extremely thrilled and motivated to take up my master's from the institution.

Your Sincerely
