

Motivation Letter for Masters in Accounting and Finance

Dear Sir/Madam

I'm writing this motivation letter along with my admission application form to apply for the Master's in Accounting program of the Institution, which I want to pursue as my next academic goal.

I'm currently working in an Accounting firm based on my graduation in the same stream and while working there I have realised that I still have long way to go in the domain of Accounting to broaden the area of my knowledge.

I'm having sound practical knowledge of Accounting and having worked in the firm I have also gained the good working exposure in the field.

I'm very much motivated to embrace the different area of Accounting through the Master's program further and I hope that I would be given admission for the same.

Thanking You

Your Truly,
