

Motivation Letter for Masters in Software Engineering

Dear Sir/Madam

I'm a graduate engineering student and I have recently completed my engineering in the IT stream from one of the well recokend engineering University of the country and now I'm looking forward to take up my master's program in the same domain.

I always wanted to pursue my master's engineering program from the most esteemed engineering University and this is why I'm addressing this motivation letter today to make my admission application in the University.

I'm extremely motivated and honoured at the same time having made my admission application to the Institution and I hope that I would stand a deserving chance to seek my admission.

Thanking You

Your Truly,
